Professional Summary

Full-Stack Software Engineer with **4.5+ years of experience** designing and delivering scalable, production-grade applications across SaaS, government, and enterprise domains. Proven expertise in **React, Angular, .NET Core, MS SQL, and Azure**. Strong track record of leading frontend modernisation initiatives, driving performance improvements, and shipping high-impact features on systems serving thousands of daily active users.

Technical Skills

Languages: TypeScript, JavaScript, C#, SQL, HTML5, CSS3, Python(Basics)

Frontend: React.js, Angular, Zustand, Syncfusion Component Library, MUI

Backend & APIs: .NET / ASP.NET Core, RESTful APIs, Event-Driven Architecture, MS SQL

Cloud: Microsoft Azure

Tools & Practices: Git, Agile/Scrum, Code Review

Experience

MRI Software

July 2025 - Present

Software Engineer II

- Contribute to **Property Tree**, a live cloud-based SaaS platform used across the APAC region for end-to-end property management, serving thousands of daily active users.
- Own critical product modules including Tenancy, Owner, and Property Management, covering invoicing, inspections, and receipting workflows.
- Led the migration of legacy AngularJS modules to React, modernising frontend architecture and improving long-term maintainability.
- Delivered the Global Search feature end-to-end — a high-visibility capability enabling cross-module discovery.
- *Tech Stack: React, AngularJS, .NET, MS SQL Server, Microsoft Azure*

Reflik

June 2024 - July 2025

Software Engineer

- Architected and built a centralised Application Tracking System (ATS) consolidating real-time data from multiple distributed office databases.
- Designed and developed a full-stack admin portal with secure authentication using MSAL and JWT.
- Engineered an Event-Driven data pipeline using Azure Function Apps to orchestrate real-time data synchronisation across SQL Server and CosmosDB.
- *Tech Stack: React, .NET, Azure Function Apps, MS SQL Server, CosmosDB, MSAL, JWT*

Civica India

Sep 2021 - June 2024

Software Engineer

- Worked on a government-grade Electoral Management System operating in a strict Agile/Scrum environment.
- Led a major refactor of a 1,500+ line monolithic component, decomposing it into modular, maintainable classes.
- Developed an Electors tree-grid using Syncfusion, enhancing hierarchical data visualisation for large datasets.
- *Tech Stack: .NET Core, Entity Framework Core, MS SQL Server, Angular 12+*

Education

Neotech Institute of Technology

2017 - 2021

Bachelor of Engineering – Computer Engineering
